

CORONA VIRUS TESTING

THUNDER BAY

Local health officials emphasize that **only those who meet strict criteria are being tested**. That means those who display **both** symptoms, such as a cough and fever, **and** who have recent travel history.

DO NOT go to the pharmacies, hospital or clinics. **Those who believe they may have symptoms should seek advice by contacting the:**

[Thunder Bay District Health Unit](#) 807-625-5900

[Telehealth](#) 866-797-0000

Only those who receive a referral from these agencies are currently being seen at the assessment centre. The centre is just outside of the Thunder Bay Regional Health Sciences Centre Emergency Department parking lot.

If you have not recently travelled and you just have a cough, you do not need testing. **This testing is for patients who have had recent travel**, as the criteria stands for now.

Those who are admitted to the Corona Virus testing centre are reminded to maintain the recommended two-metre distance from others while waiting. The centre currently has two nurses at a time, as well as a nurse outside directing visitors at the entrance to the Emergency Department.

They don't want to have many people in the assessment centre at one time.
